ClientFlow OS English

Official Quick Start & User Guide

Version 1.0 Dual-Format Included (.xlsm & .xlsx)

Thank you for purchasing **ClientFlow OS English**! This guide will help you set up and get the most out of your freelance client management system quickly and smoothly.

1. Package Contents & File Options

Your download package contains **two distinct versions** of ClientFlow OS to guarantee full compatibility across all operating systems and security environments:

File Name	Type	Best For	Key Features
ClientFlow OS English.xlsm	Macro-Enabled (.xlsm)	Windows OS / Desktop Excel	Includes 1-click "Export to PDF" button with auto fail-safe print fallback.
ClientFlow OS English.xlsx	Standard Spreadsheet (.xlsx)	Mac OS, Excel Online, Google Sheets	100% Macro-free, clean formulas, zero security prompts or ActiveX issues.

2. Quick Start Steps

Step 1: Unblock & Enable Macros (For .xlsm users on Windows)

1. Right-click on `ClientFlow OS English.xlsm` and select **Properties**.
2. At the bottom of the General tab, check the **Unblock** box (if present) and click **Apply > OK**.
3. Open the file in Microsoft Excel and click **Enable Content** on the top security bar.

Step 2: Managing Client & Invoice Data

1. Log your ongoing projects and hours in the `04_Tasks_TimeLog` sheet.
2. Record invoice summaries and status updates in the `05_Invoices` tab.
3. Track client payments and business expenses in `07_Payments` and `08_Expenses`.

Step 3: Generating & Exporting PDF Invoices

1. Navigate to the `06_Invoice_Template` sheet.
2. Select an **Invoice_ID** from the dropdown menu in cell **C3 / C4**. All details, billing totals, and line items will auto-populate instantly.
3. **If using .xlsm:** Simply click the **Export to PDF** button.
   - *Direct Export:* Generates a clean PDF file immediately.
   - *Smart Fail-Safe Fallback:* If your Windows security blocks ActiveX components, a popup will guide you to standard PDF printing seamlessly without crashing.
4. **If using .xlsx (or Mac):** Go to **File > Save As > PDF** (or **File > Print > Save as PDF / Microsoft Print to PDF**).

> **Smart Security Note for Windows Users**

If your computer restricts ActiveX PDF libraries, the template will automatically prompt: *"Direct PDF export is restricted by Windows security. Opening Print Menu... Please select 'Microsoft Print to PDF'."* Simply select your PDF printer and save—no crashes or debug errors!

3. Troubleshooting & Frequently Asked Questions

Q: Should I use .xlsm or .xlsx?

If you are on Windows Excel and want the convenience of a single button click to export invoices, use **.xlsm**. If you are on Mac OS, use Excel for Web, or prefer macro-free files, use **.xlsx**.

Q: Can I customize the invoice logo and business details?

Yes! You can edit the business name, address, contact info, and bank details directly on the `06_Invoice_Template` tab in rows 6-10.
